SUMMARY

Detail-oriented Software Engineer with a solid academic background and 8 months of practical engineering experience. Possesses a strong understanding of frontend development, UI/UX design, and database administration. Adept at collaborating on real-world systems, identifying bugs, and delivering user-centric solutions to complex technical challenges.

TECHNICAL SKILLS

- Languages: JavaScript, Python, C++, C#, Kotlin, Java, HTML5, CSS3
- Frameworks & Tools: Android Studio, Arduino IDE, Git, GitHub, MS Office
- Database & Infrastructure: Database Administration (SQL), Networking Basics
- Design & Methodology: UI/UX Designing, Web Development, Mobile Application Development

SOFT SKILLS

- Core Strengths: Problem Solving, Analytical Thinking, Adaptability, Attention to Detail
- Leadership & Teamwork: Team Work, Active Listening, Leadership, Effective Communication
- Execution: Organized, Multilingual Ability, Hardware Skills, Time Management

EDUCATION

Foundation in Cyber Security at ACK	2026/6 - Present
Higher National Diploma in Software Engineering at NIBM	2024 - 2025
Diploma in Software Engineering at NIBM	2023 - 2024
Certificate in Computer Science at NIBM	2022/8 - 2022/12

Relevant Coursework: UI/UX, Programming Languages, Data Structures, Object-Oriented Design, Database Management Systems, Software Engineering Process Management, Enterprise Software Overview, Mobile Application Development, IoT-Based Projects, Robotics-Based Projects.

WORK EXPERIENCE

Software Engineering Intern | Computer Center, Faculty of Engineering, University of Peradeniya Peradeniya, Sri Lanka — October 2025 – June 2026

- Co-engineered responsive front-end user interfaces and secure authentication logic for institutional UOP-FAMS and CLMS platforms.
- Executed extensive web interface verification suites and managed bug-tracking workflows for the Disaster Management System.
- Authored comprehensive technical project reports and managed administrative data entry systems to streamline internal documentation.
- Delivered essential IT infrastructure support, including PC hardware troubleshooting, software installations, and network configurations.

PROJECTS

UOP-FAMS (Faculty Attendance Management System)

- Role: Managed full-cycle software process, core background research, and front-end interface design.
- Key Feature: Implemented secure user authentication logic mechanisms.

UOP-CLMS (Computer Lab Management System)

- Role: Collaborated with the engineering team on framework research and responsive features.
- Impact: Delivered iterative developments to optimize lab operations.

Disaster Management System

- Role: Managed web interface verification suites and comprehensive bug-tracking routines.
- Automation: Designed automated test workflows to ensure overall platform stability.

Hotel Reservation Web Application

- Role: Team Leader, System Analyst, and UI Developer.
- Tech Stack: HTML, CSS, C++.

Robotic Based Smart Door Lock System

- Role: System Architect, Analyst, and Database Designer.
- Tech Stack: Arduino IDE, C++.

IOT Based Driver Health Monitoring System

- Role: Hardware UI Designer, Database Manager, and Core Developer.
- Tech Stack: Arduino IDE, Python, Machine Learning.

News Reporter App (MAD)

- Role: Mobile Developer, User Interface Designer, and System Analyst.
- Tech Stack: Android Studio, Kotlin, Java.

Pharmacy Management System

- Role: User Interface Designer and System Analyst.
- Tech Stack: C#.
